> Singular Frank — James Trues lell, a gen-tleman of some seventy years, living in Lib-erty, Pennsylvania, has been for over twelve years past industriously engaged, when the weather and his health would permit, in digging over a piece of ground, near his dwelling, and carrying stones and some dirt into a pile. Here he has labored, taking one stone or shovel full of dirt at a time thirty or forty feet, and is much larger than his house. He said as a reason for his la-bors, that he lost a sixpence in his garden. He soon after found several sixpences, but continued to dig until his whole garden has been carried to increase the mound. He is peaceful, and industrious in his way, and so his family let him work. To their offers of assistance he gives a decided negative, and digs away alone. Mr. Truesdell is a well intermed man, and talks rationally on every ubject but his loss sixpence.

A most extraordinary revelation was at an inquest regently, before the cor-- Solford, England. The body of a - band in the sluice at Mode woman, that she had worked as a brickset-ter for about a quarter of a century; that she had been married twice during that pe-riod; had kept a beer shop in Manchester during the early part of her career, but in every way conducted herself as a man.— The jury, after and examination, returned a verdict of "Found drowned."

Ague Cure.

Intermittent Fever or Fever and Ague, Ramittent Fever, Chill Fever, Damb Ague, Periodical Headache, or Billious Headache, and Billious Fevers; indeed for the whole Class of Diseases originating in billiary derangement, caused by the Malaria of minematic countries.

by the Malaria of minematic countries.

No one remedy is louder estled for by the naccessities of the American people than a zero and safe cure for Fever and Agne. Such a remain we are now enabled to offer, with a perfect certainty that it will erediente the disease, and with assurance, founded on proof, that no harm can arise from its use in any quantity.

That which protects from or prevents the disease where it prevails. Preventon is better than care, for the patient energes the risk which he must ran in violent attacks of this beleful distemper. This "Curn" expels the minematic polion of Faven Arm Aorn from the system, and prevents the development of the disease, if taken on the first approach of its permetitive very set discovered for this class of complaints, but also the cheaper. The larre quantity we supply for a dollar brings it wastes the reach of every bedry real in milious district where Faven arm Aorn prevails, every help should have it, and me it freely hold for company of the reach of every bedry real in milious district which have it, and me it freely hold for command protection. It is hoped this price will place it within the reach of all—the poor as well as the rich. A great superiority of this remedy over any other over discovered for the spread me any other over discovered for the spread me any other over discovered for the spread me. it within the reach of all—the poor arrived over fich. A great superiority of this remedy over any other over discovered for the spready not certain care of Intermittents is, that it commis-no Quiniss or mineral, consequently it produces no quinism or other injurious effects whatever upon the constitution. Those cured by it are left as healthy as if they had never had the dis-

left as healthy as if they had never had the case.

Fever and Ague is not alone the consequence of the minamatic poison. A great variety of disorders arise from its irritation, among which are Neuralgia, Rheumatism, Gout, Headache, Blindness, Toothache, Earache, Catarth, Ashma, Palpitation, Paintil Affection of the Spleen, Hysteries, Pain in the Bowels, Colle, Paralysis, and Derangement of the Stomach, all of which, when originating in this cause, put on the langual manual processing the poison from the blood, and consequently curse them all alike. It is an invaluable protection to immigrants, and persons travelling or temporarily residing in the maliarious districts. If taken occasionally, or daily, while exposed to the infection, that will be exercised from the system, and camot accumulate in religious quantity to ripen into disease. Hence it is even more valuable for protection than our, and few will ever suffer from Interminent, if they avail themselves of the protection this remedy affords.

Ayer's Cathartic Pills, FOR ALL THE PURPOSES OF A FAMILY PHYSIC

FOR ALL THE PURPOSES OF A FAMILY PHYSIC are so composed that disease within the range of their action can rarely withstand or evalle them. Their penetrating properties search, and cleaned, and invigorate every portion of the human organism, correcting its diseased action, and restoring its healthy vimilities. As a consequence of these properties, the invalid who he bowed down with pain or physical dishility is sate offsed to find his health or energy restored by a remedy at once so simple and inviting.

Not only do they cure the every-day complaints of every body, but also many formidable and dangerous diseases. The agent below named is pleased to furnish gratis my American Almanae, containing certificates of their cures and directions for their use in the following complaints: Costrocases, Hearthway, Hearthway, emplaints: Costrocases, Hearthway, Hearthway, Print in and Morbid Inaction of the Boneds, Printinged Complaints, arising from a low state of the body or obstruction of its functions.

Bo not be put off by unprincipled Dealers with some other pill they make underlying thes.

Ayer's Cherry Pectoral, FOR THE BAPTO CERE OF

Coughs, Colds, Influenza, Hourseness, Croup, Bronchitis, Incipient Consump-tion, and for the relief of Consumptive Patients in advanced stages of the Disease.

So wide is the field of its usefulness, and so minnerous are the cases of its cures, that almost every section of country abounds in persons publicly known, who have been restored from alarming and even desperate diseases of the lungs by its use. When once tried, its superiority over every other medicine of its kind is too apparent to escape observation, and where its virtues are known, the public no longer besitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs that are incident to our climate. While many inferior remedies thrust upon the community have falled and been discarded, this has gained friends by every trial, conferred benefits on the afflicted they can nover furget, and produced cures too numerous and too remarkable to be forgotten.
